Experience

- **4IR** 2025 - 2026
Software tester
Design and execute manual test cases for web applications.
Perform API testing using Postman.
Execute automation tests using Cypress and Playwright.
Track and report defects using Jira.
Validate backend data using SQL queries
Collaborate with developers to resolve issues. Manual Testing, Test Case Design, Test Scenario Creation, Regression Testing
Functional Testing, Performance Testing, White Box Testing, Path Testing

Education

- **TUT** 2026
Computer System Engineering

Skills

- **Software Testing:** Manual Testing, Test Case Design, Test Scenario Creation, Regression Testing, Functional Testing, Performance Testing, White Box Testing, Path Testing
Testing Tools: Postman, Cypress, Playwright, Jira, Trello, Selenium
Programming Languages: Java, JavaScript, Python, C / C++, C#, SQL
Web & CMS: WordPress, WooCommerce, Basic HTML/CSS, Basic JavaScript, Website Hosting
Embedded Systems & Hardware: PIC Microcontrollers (PIC18F4550), ADC Interfacing, PWM & Watchdog Timers, PLC Programming, VHDL Coding, Temperature & Pressure Control System

Projects

- **E-commerce Website**
Built and managed an online store using WordPress and WooCommerce
 - Customized product pages, checkout process, and user interface
 - Managed product listings, pricing, and order processing
 - Improved user experience and website performance
- **Web Application Testing Project**
Designed and executed manual test cases for a sample web application
 - Identified and reported bugs using Jira
 - Performed API testing using Postman
 - Validated backend data using SQL queries
- **Test Automation Project (Cypress & Playwright)**
 - Developed automated test scripts for web applications
 - Performed end-to-end testing and regression testing
 - Improved testing efficiency and reduced manual testing effort
